Coin120

Coin counting & bagging machine

The Coin120 is an entry level single denomination coin counting/bagging solution. It is mainly used for counting coins or tokens. It can continuously count and count to a preset number. It counts pre-sorted coins. The double dial adjustment allows simple setup. One setting of the dial is enough to select the proper denomination.

*Coins which are smaller by at least 0.5 mm than the present set denomination are off sorted automatically. Count totals can be stored in memory.

With the Coin 120 counting machine, businesses can quickly and accurately count and sort large quantities of loose coins. For single denomination currency this coin counting machine is the most accurate and fastest method to count and sort coins.

The Coin120 comes with an even greater and motorized hopper capacity. To make service easier the whole hopper can be lifted without dismounting parts.

Counting speed

Max. 2.500 Coins/Min

Hopper capacity

Max. 4.000 coins
(without the hopper extender installed for coins diameter of 15 mm and thickness of 1.1 mm.)

Max. 18.000 coins
